PROFESSIONAL SUMMARY

Versatile professional focused on agile solutions, with freelance experience in artificial intelligence training and automation development. Undergraduate student in Control and Automation Engineering, combining strong logical reasoning with practical programming skills (Python, JavaScript, C) and data management. Experienced in graphic design, office suites, and customer service. Excellent writer and communicator, with writing skills refined through constant practice in producing academic papers, presentations, and active participation in academic and corporate meetings (BRISA), ensuring clear communication and high-quality deliverables for independent and remote projects.

PROFESSIONAL EXPERIENCE

Outlier

August 2026 – Present

Freelancer / Artificial Intelligence Contributor (Aether Generalist)

- Contributed to AI model training and evaluation projects, with over 25 hours dedicated to data categorization and analysis tasks.
- Achieved verified platform qualifications in the Generalist, Python, and Portuguese (pt-BR) categories.
- Executed rapid quality verification tasks (Aether S2S Quality Screener), image analysis, and pattern identification.

BRISA - Sociedade para o Desenvolvimento da TI

May 2025 – Present

IT Intern

- Provided support and developed IT-focused routines and system maintenance.
- Resolved technical support tickets and collaborated with the team to ensure overall operational efficiency.

TECHNICAL SKILLS & FREELANCE SERVICES

- Software Development & Automation:** Applied programming skills to build functional personal and freelance projects, including a responsive Web Kanban application for organizational tasks (HTML, CSS, JavaScript) and an automated WhatsApp virtual assistant/chatbot (Node.js, Python).
- Graphic Design:** Created flyers, banners, business cards, image restoration, and vectorization using Photoshop CC and CorelDRAW.
- Data Management & Productivity:** Created dynamic spreadsheets, formatting, and presentations using the Microsoft Office suite (Excel, Word, and PowerPoint).

EDUCATION & CERTIFICATIONS

Universidade Federal do Rio Grande (FURG)

In Progress

Bachelor's Degree in Control and Automation Engineering

Professional Courses and Certifications:

- Introduction to Python (20h) - FURG (2026):** Promoted by the Institute of Mathematics, Statistics, and Physics (IMEF).
- Teaching Scholarship: FURGBOT Project (10h) - FURG (2024):** Participation in robotics competitions at the Center for Computational Sciences (C3).
- Receptionist (30h) - Fundação ParáPaz (2023):** Focus on customer service, public speaking, personal marketing, interpersonal communication, and social etiquette.
- Graphic Design (24h) - InfoFast (2021):** Photoshop CC and CorelDRAW, covering editing, filters, and creation of visual materials.

- **Basic Informatics (40h) - Recode (2020):** Practical mastery of Windows 10 and Microsoft Office 2019 suite (Word, Excel, PowerPoint).
- **English Immersion (30h) - "Speak English With No Fear" (2020):** Volunteer program focused on language practice.
- **English (Stage 1) - Callan Method English Academy (2020):** Initial training focused on language for beginners and A1 level.

LANGUAGES

- **Portuguese:** Native (pt-BR).
- **English:** Advanced reading and excellent writing skills. Ability to maintain fluid basic conversations and engage in technical-level discussions (with occasional adaptations for complex terms). Self-taught, complemented by face-to-face interactions with North American natives, resulting in significant evolution and confidence in speaking.
